Job Title:

Fire Test on One Fabric Sample

Clients Order Ref:

2367910

Date of Receipt:

26 November 2025

Date Test Started:

16 December 2025

Description of Sample:

One sample of fabric, which was referenced by the client as;

UMI FR

Work Requested:

We were asked to make the following fire test:

BS 5852: Clause 11:2006 (2011)

- * subcontracted test, UKAS accredited
- ** subcontracted test, EN ISO/IEC 17025 accredited
- *** not UKAS accredited

This report relates only to the items tested.

All tests were carried out in the laboratories in Leeds, unless otherwise indicated.

Testing BS 5852: Clause 11: 2006 (2011) Assessment of the ignitability of upholstered seating by Smouldering and Flaming sources – Source 5 (Crib 5)

Pre-Treatment

The material was subjected to the water soak procedure according to BS 5852: Annex E:2006 (2011).

Conditioning

The sample was conditioned in the environments specified in Clause 10 of BS 5852: 2006 (2011).

Testing

The material was tested according to BS 5852:2006 (2011) Methods of test for the ignitability of upholstered composites for seating by flaming sources using Source 5 (Crib 5).

The sample was tested at 19°C and 42% relative humidity (R.H.).

The sample was tested over combustion modified polyurethane foam with a density of approximately 34-36kg/m³.

Results

The following test results relate only to the ignitability of the combination of upholstery composites under the particular conditions of test stated; they are not intended as a means of assessing the full potential fire hazard of the materials or products in use.

	Specimen 1	Specimen 2
Time of Ignition (mins/secs)	0.05	0.06
Time of Flame Extinction (mins/secs)	4.36	4.22
Time of Smoke Extinction (mins/secs)	7.59	6.58
Time of cover split (mins/secs)	DNO	DNO
Extent of damage (mm) - Seat		
Width	84	47
Length	50	52
Depth	28	26
Extent of damage (mm) - Back		
Width	73	75
Depth	24	28
Melting	No	No
Dripping	No	No
Charring	Yes	Yes
Comments and Observations	DNO	DNO
Specimen Result (Ignition or Non-ignition)	Non-Ignition	Non-Ignition

Acronyms

ME – Manually extinguished
DNO – Did not observe time of events

EC – Escalating combustion
BTT – Burnt through thickness of foam

DNS – Material did not split
BTE – Burnt to extremities

Comment

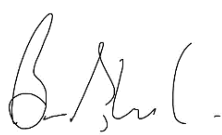

The results indicate 'Non-Ignition' of the materials and the test is designated NI/5 (ie. Pass).

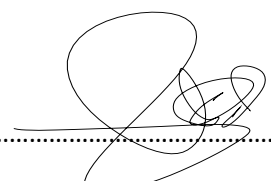

Where required to make a judgement to any pass/fail criteria an estimation of uncertainty of measurement has been taken into account. Under our Policy we have used a non-binary decision rule.

See our decision rules Policy (<https://www.bttg.co.uk/about-us/decision-rules-policy/>) for further information.

Uncertainty Budget

Timings: ± 2 seconds.
Measurements: ± 2 mm.
Weight: ± 2 g.
